

What is it?

A service that provides a Windows Desktop to users from any device and any location. This enables remote access to work PCs when working off-site for any length of time and ensures that your business maintains a high level of service and operations, wherever your staff are. This is a fantastic short-term, quick response business continuity solution, but we recommend a more advanced VPN infrastructure once initial risks are mitigated.

Starcom delivers this service with a rapid turnaround time and our team will also show you how to use the remote desktop.

What are the benefits?

- Enables remote access to work PCs, applications and file storage should you or your colleagues need to work off-site
- Access your work PC and applications from anywhere to alleviate problems associated with remote working
- For those without VPN access or remote desktop technologies
- Available on Microsoft, Mac, iOS and Android devices
- Immediate setup
- Datacentres protected by exceptional physical and IP security
- 24/7 support, 365 days a year

How much does it cost?

£25 per user, per month on a 1-month rolling contract.
